

GREEN

BOND 2023
REPORT

INDEX

1. Introduction
2. Use of proceeds categories:
 - A) Packaging and waste
 - B) Carbon footprint
 - C) Water footprint
3. Verification

INTRODUCTION

At Arca Continental, we operate a sustainable business model that is integrated into the thinking and actions of those who collaborate within the organization, and developed jointly with suppliers and customers throughout the value chain.

It is a key component for sustainable growth, operational excellence, environmental protection, and the overall development of the community, enclosed by an ethical, transparent, and responsible framework, driven from within our corporate culture and corporate governance.

With the issuance of our first green bond in 2021, we reiterate our commitment and leadership towards environmental initiatives, while contributing significantly to meeting the Sustainable Development Objectives of the United Nations.

In 2022 we allocated a total of Ps. 2,114.3 million towards projects corresponding to four of the categories of our Framework: Renewable Energy, Energy Efficiency, Sustainable Water and Waste Water Management, and Eco-efficient and/or Circular Economy Adapted Products, Production Technologies and Processes.

Investments spanned projects in all five countries in which we operate.

As of the date of this report, we have allocated 100% of the proceeds obtained.

 PetStar, the largest food grade PET recycling plant in the world.

2. USE OF PROCEEDS BY CATEGORY

ASSIGNMENT OF RESOURCES IN 2022 (PS. MILLION)

Packaging & Waste **1,445.8**

Carbon Footprint **566.4**

Water Footprint **102.1**

TOTAL ACCUMULATED ALLOCATION

PS. 2,114.3 MILLION

PS. 2,620.2 MILLION

■ Assigned in 2022
■ Assigned in 2021

PACKAGING & WASTE

CARBON FOOTPRINT

WATER FOOTPRINT

PACKAGING AND WASTE

At a time of disruptions in the global supply chain, which brought challenges in our purchase of raw materials for production, we maintained a solid relationship based on trust with our suppliers and we developed innovative solutions to manage inventories, making us able to sustain the continuity of our operations and the achievement of our goals.

We reached a global average of 23.6% RPET + BIOPET contained in our packages, thus avoiding the usage of over 42 thousand tons of virgin resin thanks to recycling, lightening, and innovation projects.

RECYCLED PET+ BIOPET IN OUR PACKAGING (%)

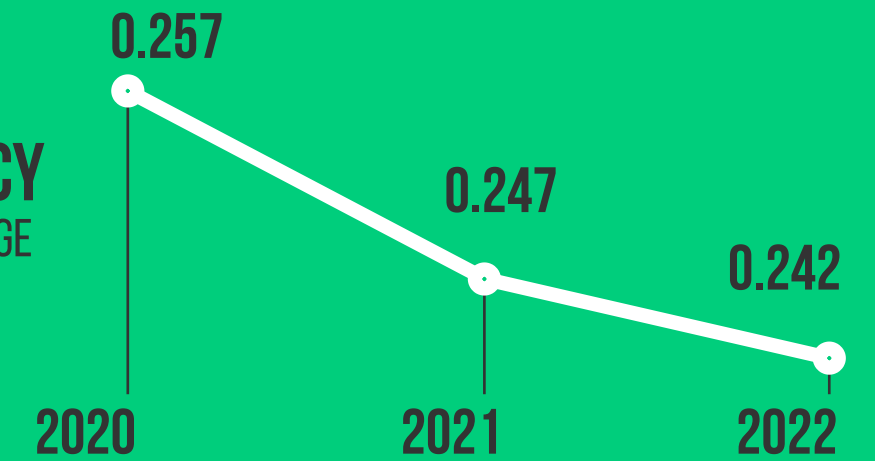

CARBON FOOTPRINT

Arca Continental has demonstrated its commitment towards efficient energy through the implementation of projects focused on the renewal, installation, operation, and maintenance of energy-efficient infrastructure and equipment, as well as utilizing renewable energy in its operations.

POWER USAGE EFFICIENCY (MJ/L BEVERAGE PRODUCED)

CONSUMPTION OF RENEWABLE ENERGY (% OF TOTAL PRODUCED BEVERAGES)

WATER FOOTPRINT

In conjunction with The Coca-Cola Company, we focused our efforts on the following areas of business: the prevention of and adaptation to situations of water stress, the integration of best practices for its efficient usage, the replenishment of basins to continue returning to nature 100% of the water used in our production processes, and the fostering of its availability within communities.

Within our operations, we remained at the forefront of technology and processes to capture, treat, reuse, and optimize the use of water to ensure the efficient use of this resource.

WATER EFFICIENCY
(LITERS OF WATER / LITERS OF BEVERAGE)

3. VERIFICATION

This report includes the verification of Sustainalytics, an independent third party that evaluated and verified the proper allocation of resources from the green bond based on the eligibility criteria and the performance indicators for every criterion described in the Arca Continental Framework.
